

American
Heart
Association.

We are taking care of health care.

The American Heart Association is working to make sure health care systems and providers on the frontlines of the COVID-19 pandemic have the training and resources they need. We're investing in programs that help with treatment and ensure optimal care for patients.

UPDATED TRAINING PROGRAMS

Created new, no cost oxygenation & ventilation training to support health care providers working with COVID-19 patients who do not typically work with critical patients.

Offered blended learning options

so health care staff have options for learning and refreshing resuscitation skills while maintaining physical safeguards for health.

Offered RQI We Can Help: CPR Training in the Age of Social Distancing program in specific countries.

Extended AHA Instructor and Provider Course Completion Cards beyond their recommended renewal date

to provide additional flexibility for providers, AHA Instructors, and Instructor candidates during the COVID-19 pandemic.

DEVELOPED & LEVERAGED NEW SCIENCE

Compiled interim CPR guidelines

to help rescuers treat victims of cardiac arrest with suspected or confirmed COVID-19.

Produced COVID-19 clinical guidance podcast series on specific conditions

including stroke, women and heart disease, high risk pregnancy, drug interactions and diabetes.

CONNECTED PROFESSIONALS & TECHNOLOGY

Developed the first CVD-focused COVID-19 registry that will provide insights to care and adverse cardiovascular outcomes, available to health care systems in the U.S. and internationally.

Used AHA technologies to accelerate antiviral drugs to combat coronavirus

through the Lawrence Livermore National Laboratory.

Connected health care professionals on the front lines from multiple countries

through podcasts, chat apps, and forums to share learnings and guidance.
