

SUBMISSION GUIDELINES

IMPORTANT: Abstracts must include data (absolute values) in detail sufficient to support conclusions. Abstracts that do not contain data (absolute values) will not be considered for review.

Submission Guidelines

The body of the abstract must not exceed 1,950 characters (not including spaces). Each graphic counts as 500 characters. Each table counts as 500 characters.

Briefly describe the objectives of the study unless they are contained in the title. Include a brief statement of methods, if pertinent.

Abstracts should not describe research in which the chemical identity or source of the reagent is proprietary or cannot be revealed. Authors should not “split” data to create several abstracts from one. If splitting is judged to have occurred, priority scores of related abstracts will be reduced. Abstracts containing identical or nearly identical data submitted from the same institution and/or individuals will be disqualified.

The following guidelines apply:

- Do not re-enter the abstract title or the authors’ names/institutions.
- Use generic drug names.
- Do not begin sentences with numerals. When percentages are used, the absolute number from which they are derived must be included, *e.g.*, “33% (10 of 30).”
- Standard abbreviations may be used without definition. Nonstandard abbreviations must be kept to a minimum and placed in parentheses after the first use of the abbreviated word or phrase.
- Do not include references, credits, or grant support.
- Do not include names or personal information of any patient participating in the study or trial.
- Proofread abstracts carefully to avoid errors. Abstracts may not be revised after May 25, 2023.

Abstract Acceptance and Presentation

Acceptance

- Abstracts are selected on scientific merit and are allocated to oral or poster presentations.

Previously Presented Abstracts: The work covered by the abstract must not have been presented at a national or international meeting before presentation at Hypertension 2023.

Previously Published Abstracts: Abstracts associated with a published manuscript can be presented at an AHA scientific event if the manuscript was published after the time the abstract was submitted to the event. However, the abstract will not be published as a part of the journal publication.

Embargo Policy

- Abstracts and presentations are embargoed for release at date and time of presentation or time of AHA news event. Written embargoed information cannot be shared, but one-on-one embargoed media interviews can be conducted as long as the reporter agrees to abide by the embargo policy. Failure to honor embargo policies will result in the abstract being withdrawn and barred from presentation.

Presentation

- Submission of an abstract constitutes a commitment by the author(s) to present it if accepted. Failure to present, if not justified, will jeopardize future acceptance of abstracts.
- Presentation guidelines will be provided to authors of accepted abstracts.
- Request Poster Only, Oral Preferred or All Formats on the Presentation Preference page of the Abstract System. Selecting Oral Preferred will neither prejudice acceptance or guarantee oral or poster presentation, because abstracts must be arranged to fit into a thematic group for presentation. However, the AHA will make every effort to accommodate your presentation request.
- If you select "Poster Only" and your abstract is accepted, this request will be granted.
- All presentations and question-and-answer sessions will be conducted in English. Presenters may request assistance from the moderator, who will repeat or rephrase questions from the audience or may ask a colleague in the audience to assist with translation.
- Expenses (including conference registration fees and travel expenses) associated with the submission and presentation of an abstract are the responsibility of the presenter.
- Recording of sessions by audiotape, video, or still photography requiring flash devices, special lighting, or bulky equipment is prohibited.
- The AHA reserves the right to all video or audio recordings of presentations at Hypertension 2023 Scientific Sessions.
