

American Heart Association Scientific Sessions 2026
Submission Guidelines
Late-Breaking Basic Science

Submission Period: June 22 – August 24, 2026, 6:00 p.m. CT/UTC-4

Submission Fee: Member \$45/Non-member \$95 – [Become a Member Now](#)

Late-Breaking Basic Science abstracts are described as highly meritorious, high-impact science. These innovative abstracts will provide the latest breakthroughs in basic science, presenting cutting-edge, exciting and pivotal research results. Emphasis will be given to genuine innovation and fundamental, distinctive, novel research. Abstracts will be evaluated based on their impact and novelty.

Overall Abstract Submission Requirements

- All abstracts must be submitted (and if accepted, will be presented) in English having accurate grammar and spelling suitable for publication.
- Submit statistical results, including descriptive and inferential statistics.
- Author must affirm the work submitted is original and all statements declared as facts are based on thorough examination and investigation for accuracy.
- Authors should not "split" statistical data to create several abstracts from one study. If splitting is judged to have occurred, prior scores of related abstracts will be negatively influenced.
- Abstracts containing identical or nearly identical data submitted from the same institution and/or people will be disqualified.
- Proofread abstracts carefully to avoid errors before the submission deadline. The abstract will be published exactly as it has been submitted.
- Submission of an abstract constitutes a commitment by the author(s) to present if accepted. Failure to present, if not justified, will jeopardize future acceptance of abstracts for American Heart Association meetings/conferences.
- There is no limit to the number of abstracts an investigator may submit. If selected, the presenter must be one of the co-authors listed. If multiple submissions are accepted, the presenting author must resolve schedule conflicts by arranging for a co-author to present.
- The American Heart Association is committed to upholding the highest standards of scientific integrity in all abstracts submitted to its scientific meetings. By submitting an abstract, authors confirm that the work is original, accurately presented, and consistent with the American Heart Association's standards for ethical and responsible scientific communication. All abstracts submitted to American Heart Association scientific meetings are subject to peer review and may undergo additional scientific integrity assessments, which may include expert evaluation and analytical tools to identify concerns related to originality, authorship, ethical conduct, or appropriate use of emerging technologies. Abstracts that do not meet American Heart Association's scientific or ethical standards may be subject to further review or disqualification.
- All abstract withdrawal requests must be received in writing via email to megan.eboch@heart.org by October 28, 2026, to avoid publication.

American Heart Association Scientific Sessions 2026
Submission Guidelines
Late-Breaking Basic Science

Abstract Title

- An abstract must have a short, specific title (containing no abbreviations or inflammatory language) that indicates the nature of the investigation.
- Avoid an abstract title that reveals the results of the study. Explicit titles denoting the findings should be used.

Abstract Body Content

- The American Heart Association is committed to presenting quality science.
 - Only the strongest abstracts will be accepted under competitive review standards.
 - Repeated low-quality or mass submissions may affect future eligibility.
 - To preserve abstract integrity, submissions linked to paper mills or containing invalid research will not be accepted into the program.
- We recommend that abstracts have the following identifiable sections:
 - Introduction/Background
 - Research Questions/Hypothesis
 - Methods/Approach
 - Results/Data (descriptive and inferential statistics)
 - Conclusion(s)
- Looking for recommendations on how to improve your abstract? We highly recommend you view [these recommendations](#) from American Heart Association journals.
- Use generic drug names.
- Avoid beginning sentences with numbers.
- Standard abbreviations may be used without definition. Nonstandard abbreviations (kept to a minimum) must be placed in parentheses after the first use of the word or phrase abbreviated.
- Do not include references, credits or grant support.
- Do not include the names or personal information of any patient participating in the study or trial.

Abstract Character Guidelines

- Abstracts are limited to 2,500 characters (about 360-630 words).
- Counts towards character limit:
 - Text in the abstract body
 - Punctuation in the abstract body
- Do not include the following in the abstract body:
 - Title of abstract
 - Names of authors
 - Caption of graphics
 - Graphics, Images, figures or tables
 - Spaces in the abstract body

American Heart Association Scientific Sessions 2026
Submission Guidelines
Late-Breaking Basic Science

Graphics Guidelines (Figures and Tables)

- All graphics (figures) and text-based graphics (tables) should be provided as 72-300 dpi, pre-sized .BMP, .GIF, .JPG or .PNG images only, with a maximum width of 440 pixels (no limit on length). Black-and-white digital images should be in grayscale mode. Color images should be saved in RGB color mode.
- All graphics will require a brief description of the image.
- Please Note: If an abstract is accepted for publication, any images submitted with the abstract are placed after the abstract that will appear in the online-only supplement to *Circulation*, an American Heart Association journal.

Abstract Authors

- The submitting author will be designated as the primary and presenting author unless otherwise specified. The presenting author must be listed on the abstract and can be listed anywhere in the author block.
- Contribution Criteria for Author Inclusion
When prioritizing authors, consider the following:
 - Substantial Intellectual Contribution
 - Conceptualization or design of the study
 - Data acquisition, analysis, or interpretation
 - Approval and Accountability
 - Final approval of the version submitted
 - Agreement to be accountable for all aspects of the work
- Please review the author block carefully. Edits cannot be made after the August 24, 6:00 PM CT/UTC-4 deadline. Once submission is complete, the author block will be published as submitted. Additions or deletions of author names are not permitted after the submission deadline.

Abstract Revisions

- After the August 24, 2026, 6:00 PM CT/UTC-4 deadline, your abstract submission is considered final and cannot be edited.
 - Abstracts may not be revised in any way or resubmitted.
 - Additions or deletions of author names will not be permitted.
- Proofread abstracts carefully to avoid errors before submission.

Abstract Copyright Transfer Agreement

- Abstract Copyright Transfer Agreement will be electronically signed during submission.
 - Your selection of "Yes" will grant permission to publish.
 - Your selection of "No" will prohibit publication of the abstract in all formats, including the *Circulation* supplement, ePoster site, the mobile meeting guide app, and the online program planner.

Abstract Review

- Abstracts successfully submitted by the August 24, 2026, 6:00 pm CT/UTC -4 deadline are posted to a secured website for blind review. Our intent is to be inclusive of quality science received without compromising scientific integrity. As such, a team of eight to 10 experts, selected by the Committee for Scientific Sessions Programming, independently reviews abstracts in the category that best fits their expertise.
- Abstracts submitted for consideration must convey an original idea, concept, or an improvement or revision of a previous idea. Abstracts are selected on the basis of the following:
 - Scientific merit - direction toward the development of a new or improved diagnostic procedure or idea.
 - Organization - well organized, easy to follow and understand.
 - Practicality - should be available, logical and feasible.
 - Presentation - should be clear, brief, show understanding of the subject matter.
 - Technical quality - the idea must stand up to scrutiny. Facts and data have scientific backing.

Abstract Acceptance

- Abstract acceptance/non-acceptance status will be available by mid-September. Please ensure the email provided for the presenting author is accurate as all correspondence will be sent via email, to the presenting author only.
- All communications regarding your abstract will be sent from AHAScientificAbstracts@heart.org. Please make sure to add this email address to your email contacts to ensure important program participant-related information gets through your spam filters, etc.
- All accepted abstracts will be scheduled in oral, moderated digital poster or poster board presentation formats.
 - Presentation Preference
 - Any Format: The program committee may schedule your abstract for presentation in an oral session, moderated digital poster session, or poster board session.
 - By selecting Any Format, if your abstract is accepted for presentation, you agree to present your abstract orally in an abstract oral session or moderated digital poster session, or as a printed poster in a poster board session
 - Poster Only: The program committee will only schedule your abstract for presentation in a poster board session.
- Please note that it will be mandatory for all poster presentation types to also be submitted as online E-posters before the conference. This will extend the viewership of your science. Should your abstract be selected for a poster presentation, instructions will follow.
- All presentations, including question-and-answers will be conducted in English. Presenters may request assistance from the moderator who will repeat or rephrase questions from the audience or may ask a colleague in the audience to assist with translation.
- Guidelines for abstract presentation will be included in the acceptance communication.

American Heart Association Scientific Sessions 2026
Submission Guidelines
Late-Breaking Basic Science

Abstract Journal Publication

- Accepted abstracts having selected “Yes” to the Abstract Copyright Transfer Agreement will be published online in the *Circulation* journal supplement.

Embargo Policy

- Late-breaking basic science abstracts and presentations are embargoed for release until date and start time of presentation at Scientific Sessions 2026.
- Written embargoed information cannot be shared with anyone outside of the American Heart Association, except for a journal manuscript in which one-on-one embargoed media interviews can be conducted if the reporter agrees to abide by the embargo policy. Failure to honor embargo policies will result in this abstract being withdrawn and future abstracts also being barred from presentation. [Complete American Heart Association Embargo Policy](#)

Recording Policy

- Unauthorized recording of the American Heart Association Scientific Sessions, scientific conferences, and the AHA/ASA International Stroke Conference is prohibited, whether by video, still or digital photography, audio or any other recording or reproduction mechanism. This includes recording of presentations and supporting audiovisual materials and poster presentations and supporting poster materials.
- The American Heart Association and American Stroke Association reserve the rights to all recordings or reproductions of presentations at AHA/ASA scientific conferences and meetings.

Use of Automated Assistive Writing Technologies and Tools

- The use of automated assistive writing technologies and tools (commonly referred to as artificial intelligence or machine learning tools) is permitted provided their use is documented, and authors assume responsibility for the content. The authors are responsible for the accuracy, validity and originality of computer-generated content. Automated assistive writing technologies do not qualify for authorship as they are unable to provide approval or consent for submission.
- If the use of these technologies has been used to carry out or generate analytical work, the tools utilized should be documented in the abstract.
- Not acceptable use:
 - AI-generated abstract with minimal or no human revision
 - AI-generated scientific ideas, claims, data, or conclusions
- For additional information, see the [World Association of Medical Editor recommendations](#).
- For your abstract submission, you will need to indicate the use of these tools.
