The United States has the highest maternal mortality rate among industrialized countries, and cardiovascular disease is the leading cause of pregnancy-related mortality in the U.S. (Mehta et al., Circulation, 144:e251, 2021). Major racial disparities exist in maternal health outcomes. Black women experience pregnancy-related death at a rate 2.5 times higher than White women and 3.5 times higher than Hispanic women, and American Indian/Alaska Native women experience pregnancy-related death more than twice as often as White women (Hoyert, NCHS Health E-Stats, 2021). College-educated Black women are still at higher risk than White and Hispanic women with less than a high school diploma, and Black college-educated women are five times as likely to die than White college-educated women (Petersen et al., Morbidity and Mortality Weekly Report, 68(35), 2019; Bond et al., Circ Cardiovasc Qual Outcomes, 14:e007643, 2021).

Health Equity Research Network (HERN): On Disparities in Maternal-Infant Health Outcomes

Call to Action

Maternal mortality is alarmingly high at about 700 deaths a year in the United States, with cardiovascular disease (CVD) being the leading cause of pregnancy-related death.

AHA is committed to leveraging advocacy efforts and working with strategic partners to develop sustainable and impactful solutions for preventing maternal death and ensuring all individuals experiencing pregnancy can live healthy lives before, during, and after giving birth.

AHA recommends a multi-pronged approach to help reduce US maternal mortality rates, including: improving health literacy and public awareness on preconception care; achieving cultural competency and bias reduction among providers; mitigating the impact of social and structural determinants of health; transforming payment and promoting value-based care; modernizing healthcare delivery infrastructure and expanding care-coordination; improving public health infrastructure and digitally enabled healthcare; improving quality reporting of maternal outcomes and health metrics; and expanding access to quality postpartum care.

The Fiscal Year is Ending
Thank you

We would like to express our sincerest appreciation to all the lay stakeholder volunteers who have served or are waiting to serve for your valuable efforts and willingness to stand ready for an assignment in 2021-2022.

The strength of the American Heart Association is in its volunteers.

Lay Stakeholder Science and Research Task Force

Many thanks to the Jackie Ng-Osorio, PhD, Sally Powers, Tara Robinson, Larry Sadwin, and Shirley Yoshida for passionately and faithfully completing their term on Task Force.

2021–2022 Lay Stakeholder Task Force Members

Bernie Dennis, Chairperson,
Richard James, Jackie Ng-Osorio, PhD, Sally Powers, Tara Robinson, Larry Sadwin, Shirley Yoshida

It has been a productive and powerful year for the patient community! Achievements include an influential patient voice on AHA research and science committees and projects, new strategies for recruiting more non-scientist volunteers from under-represented groups, new strategies for public acknowledgment of lay stakeholder volunteers - The Lay Stakeholder’s Virtual Awards Ceremony on December 7, 2021, more than 172 volunteers with varying backgrounds, patient health profiles, caregiver profiles, and service experience retained for recruitment on committees and projects.

The task force touched base with AHA Regional Executive Vice Presidents and others to revisit the Lay Stakeholder Initiative and encourage nominations of lay stakeholders in all regions to widen volunteer diversity (ethnicity, sex, race, age). Interviews with science volunteers provide an opportunity to highlight patient advocate involvement and the value of involvement. What a year!

ACKNOWLEDGING JUNETEENTH

A celebratory time from history, Juneteenth National Independence Day, also known as Jubilee Day, Emancipation Day, Freedom Day and Black Independence Day which is a federal holiday in the United States commemorating the emancipation of enslaved African Americans. Often observed for celebrating African American culture. Originating in Galveston, Texas, it has been celebrated annually on June 19 in various parts of the United States since 1865.
