

Carrie Patton has been with the American Heart Association for 29 years, currently serving as a national senior director within the AHA Office of Science. She is responsible for overseeing the AHA's strategic and board-commissioned research initiatives including networks, team science, and other large research grant programs. Carrie directs a staff team responsible for ongoing research program management and supporting the Oversight Advisory Committees comprised of science volunteer leaders. Additionally, she plays an active role in staffing the Research Committee and other assigned task forces and working groups. Carrie is the primary liaison to the Mission Advancement team at the AHA, and actively collaborates with development staff to raise major gifts for funding research. She is married with two grown daughters, a son-in-law, two grandsons, and three rescue dogs who all keep her busy outside her AHA life.
