

Huitong Ding, Ph.D.

Postdoctoral Research Associate

Dr. Ding is a Postdoctoral Associate in the Department of Anatomy & Neurobiology at Boston University Chobanian & Avedisian School of Medicine. He was previously a visiting scholar at the Brain Health Research Lab/Neuropsychology Group at Framingham Heart Study where he received training in brain aging research and explored the application of advanced analytical approaches to conduct interdisciplinary research in cognitive science. As a purpose-driven health data scientist, his current research explores cognitive heterogeneity, sex differences, early detection, and digital phenotyping of cognitive impairment, with plans to explore common chronic diseases using inclusive approach.
