South Central Postdoctoral Fellowship Program Description and Eligibility Criteria

Award Activation: July 1, 2011

Program Description, Eligibility and Peer Review Criteria

Objective
To help trainees initiate careers in cardiovascular and stroke research while obtaining significant research results under the supervision of a sponsor or mentor; supports individuals before they're ready for some stage of independent research.

Science Focus
Research broadly related to cardiovascular function and disease and stroke, or to related clinical, basic science, bioengineering or biotechnology, and public health problems, including multidisciplinary efforts.

Disciplines
Proposals are encouraged from all disciplines as well as epidemiological, behavioral, community and clinical investigations that bear on cardiovascular and stroke problems.

Target Audience

- At the time of award activation, must have doctoral degree, including M.D., Ph.D., D.O., D.V.M. or equivalent.

- At the time of award activation, individuals with six or more years of postdoctoral research training or experience are ineligible. At the time of award activation, individuals who will have completed at least five years of postdoctoral research training or experience are eligible for one year of support only. Time spent in a postdoctoral research associate or postdoctoral research technician position is considered relevant postdoctoral experience. Time spent in clinical training is excluded from the eligibility limit.

Sponsor
It's important for the new fellow to receive wise counsel and direction from an established investigator interested in the conduct and progress of the research project during the research training period. Each fellow must have a sponsor.

A fellow must have substantial involvement in preparing the application, understanding that the sponsor will play a significant part in guiding the applicant.

Co-sponsorship is exceptional, but allowed. However, this will be counted as one fellow per co-sponsor with respect to affiliate sponsorship limits.

Because the fellow receives only a stipend from these awards, additional research support for the proposed project MUST come from the sponsor's laboratory. Therefore, the proposed project will likely be related to the sponsor's funded research. The sponsor should clarify the role that the applicant played in the development of the proposal, the relationship of the proposed project to ongoing research in the sponsor's laboratory, and how the project will contribute toward the training and career development of the applicant.

Citizenship
At the time of application, must have one of the following designations
U.S. citizen
Permanent resident
Pending permanent resident. Applicants must have applied for permanent residency and have filed form I-485 with the U.S. Citizenship and Immigration Services and have received authorization to legally remain in the United States (having filed an Application for Employment Form I-765).
E-3 - specialty occupation worker
F1 - student visa
H1-B Visa - temporary worker in a specialty occupation
J-1 Visa - exchange visitor
O-1 Visa - temporary worker with extraordinary abilities in the sciences
TN Visa - NAFTA Professional

Exception: Postdoctoral fellowship applicants outside the United States at the time of application must provide visa documentation prior to award activation.

Awardee must meet American Heart Association citizenship criteria throughout the duration of the award.

Location of Work
The award may be completed at any accredited institution in Arkansas, New Mexico, Oklahoma or Texas.

American Heart Association research awards are limited to non-profit institutions, including medical, osteopathic and dental schools, veterinary schools, schools of public health, pharmacy schools, nursing schools, universities and colleges, public and voluntary hospitals and others that can demonstrate the ability to conduct the proposed research.

Applications will not be accepted for work with funding to be administered through any federal institution or work to be performed by a federal employee, except for Veterans Administrations employees.

Funding is prohibited for awards at non-U.S. institutions.

South Central Affiliate Postdoctoral Fellowship candidates who wish to complete part of their training outside of the host institution must justify this request in the application.

Budget/Annual Award Amount

Trainee Stipend/Salary:
Commensurate with years of postdoctoral research and clinical experience at time of award activation; stipend totals represent combined salaries and fringe benefits.

0 years = $35,000
1 year = $37,000
2 years = $39,000
3 years = $41,000
4 years = $43,000
5 years = $45,000

Fringe Benefit: $1,000 for health insurance

Project Support: Up to $2,000.00/year in addition to stipend.

The award does not allow indirect costs, dependent allowance or tuition.

Total Annual Award Amount: $38,000-$49,000
**Award Duration:** Two years

Only in extraordinary circumstances will the Research Committee consider a third year of funding, if eligible. Fellows who wish to compete for a third year must submit a new application according to the program guidelines. New applications are allowed in the final year only. This is a new, competitive application not an application for renewal.

To apply for the one-year award, be certain you select the one-year electronic application in Grants@Heart.

**Peer Review Criteria**
To judge the merit of the application, reviewers will comment on following criteria. Please be sure to address these in your proposal. Each criterion will account for a third of the overall score.

**Criterion 1 - Evaluation of the Investigator**

1. Does the trainee have potential for a research career?
2. Are the trainee's career plans specified in the application?
3. Is this supported by the trainee's academic record and the assessment provided by the three letters of reference?
4. Does the trainee have prior research experience and/or publications?
5. Is there a clear rationale supporting the need for the proposed training?
6. What is the sponsor's assessment of the applicant?

**Criterion 2 - Sponsor/Training Plan and Environment**

**Sponsor/Training Plan**

1. Is the mentor an independent investigator?
2. Does the mentor have the experience to direct the proposed research training, as evidenced by a track record regarding productivity, funding and prior trainees?
3. Does the mentor have adequate current funding to support the fellow's project?
4. Does the mentor provide a comprehensive training plan that will facilitate the applicant's progress towards his/her research career goals?

**Environment**

1. Does the scientific environment in which the work will be done contribute to the probability of success for the training experience?
2. Is there evidence of institutional commitment?

**Criterion 3 - Evaluation of the Proposal**

1. **Significance:** Does this study address an important problem broadly related to cardiovascular disease or stroke? What will be the effect of these studies on the concepts, methods and technologies that drive this field?

2. **Approach:** A new fellow may not have had adequate time to generate preliminary data. Applicants can present preliminary data generated by the sponsor. The assessment of preliminary data, whether generated by the sponsor or the applicant, should be put into perspective so that bold new ideas and risk taking by beginning investigators are encouraged rather than stymied. Are the conceptual framework, design, methods and analyses adequately developed, well integrated, well reasoned, feasible (as determined by preliminary data or the expertise available in the mentor's and/or
collaborator’s laboratories) and appropriate to the aims of the project? Does the applicant acknowledge potential problem areas and consider alternative tactics?

3. **Innovation**: Is the project original?

Applicants should never contact reviewers regarding their applications. Discussing scientific content of an application or attempting to influence review outcome will constitute a conflict of interest in the review. Reviewers must notify the AHA if an applicant contacts them.

**Restrictions**

- This award is not for individuals of faculty/staff rank. (Exception: M.D. or M.D./Ph.D. applicants with clinical responsibilities who hold a title of instructor or similar due to their patient care responsibilities, but who devote at least 75 percent effort to research training.)

- At the time of award activation must have a doctoral degree. Candidates may not hold a research fellowship while enrolled in a graduate training program.

- Teaching assignments and clinical functions directly related to the research project may be useful but are only permitted on a limited basis. Administrative duties and private practice are forbidden during the tenure of the fellowship.

- Postdoctoral fellowship awardees must resign an award if promoted to a staff or faculty position.

- At the time of award activation, the fellow cannot be pursuing a doctoral degree. Applicants in this situation should be referred to the AHA predoctoral fellowship.

- Awardee may not hold another AHA award concurrently.

- The fellow may not hold a comparable award as a source of supplementation.

- An applicant may submit only one affiliate application per deadline. If eligible, an applicant may simultaneously submit an application to an affiliate and to the national award program. The proposed research plan may need to be adjusted based upon different length of award and dollars available. The deadline dates may be different for each submission. If both are funded, the applicant must choose one award.

- Postdoctoral fellowships are awarded for two years. Only in extraordinary circumstances will the Research Committee consider a third year. New applications are allowed in the final year only and must address and justify the need for a third year of support. This is a new, competitive application, not an application for renewal. The South Central Affiliate allows a maximum of three years of AHA postdoctoral fellowship support per individual.

- Sponsor may have no more than two AHA-funded Fellows (postdoctoral) at any time.

- At the time of award activation, individuals with six or more years of postdoctoral research training or experience are ineligible. At the time of award activation, individuals who will have completed at least five years of postdoctoral research training or experience are eligible for one year of support only. Time spent in a postdoctoral research associate or postdoctoral research technician position is considered relevant postdoctoral experience. Time spent in clinical training is excluded from the eligibility limit.

- An applicant who is unsuccessful in a competition may resubmit the same or similar application three times (the original plus two resubmissions). The same or similar application submitted for the fourth time will be administratively withdrawn.
