State-of-the-Science Stroke Nursing Symposium 2019 Abstract Categories and Definitions

**Professional Development: Education, Inspiration and Illumination**
This includes topics related to enhancing stroke science and practice through continuing education, training and mentoring for all levels of nurses, providers, and clinicians.

**Acute Care: Advances in Clinical Research, Practice and Quality Improvement**
This includes clinical research related to acute stroke care as well as innovative advanced practice concepts, fundamentals in stroke nursing clinical practice at the bedside, and quality improvement.

**Rehabilitation and Recovery: Facilitating Admission, Progression and Discharge for Stroke**
This includes topics that highlight successful efforts to improve coordination of stroke care along the continuum of care in acute rehabilitation, post-acute care, and outpatient and community settings that focus on assisting stroke survivors and caregivers to cope with long term issues after stroke.
